Babu's Got Shaez

Whether he did it deliberately, or it was a slip of the pen, I don't know. But when one customer ordered "nineteen **barefoot** seedlings," the name struck a responsive chord. It seemed to fit my Orchid Babies better than the term, "Bare Root."

No matter what you call 'em, the fact is they SELL — many of my good customers buying again and again, every time a new list of them is offered.

Then WHY, I wonder, are there still some of you who never have bought your seedlings "barefoot"? Maybe you are not convinced they will reach you in good condition? Or, do you lack the pots, osmunda, and/or time to pot them when they arrive? Are you still not sure you know exactly HOW to pot? Afraid you might choke them, pinch their toes, or pot so insecurely they'd climb right out of their first shoes?

Or, why not admit it, are you just too lazy to try?

Then you have no excuse for shying away from them now. These husky babies, fitted by an expert with their first shoes, are happily learning to "walk". They are "cheaper by the dozen" so why not adopt all twelve and give them a good home?

I am sure you and they will make a very happy family!
